

Fire-resistant hollow wall boxes

UHW50P-BW Fire resistant Perilex hollow wall junction box Ø 16/19 mm

- Maximum 90 minutes fire resistant in an insulated wall.
- Maximum 60 minutes fire resistant in a non-insulated wall.
- Tested in a non-load-bearing wall construction with 2 x 12,5 mm plasterboard panels on both sides.
- Halogen-free.
- Equipped with a detachable combi spout.
- Equipped with 2 conical pipe inlets with integrated lock for both 16 and 19 mm pipe, one of which is closed by a break-out port.
- Firm mounting of the box in the wall thanks to the metal screw plates with 3-fold pitch.
- No gap formation between switchgear and wall due to very thin, solid support edge of the metal fasteners.

Attema has a complete range of hollow wall boxes for fire resistant hollow walls. These are just as easy to assemble as the standard hollow wall boxes. The fire resistant boxes are red, which makes them clearly distinguishable from hollow-wall boxes that are not provided with the fire resistant material. Depending on the type of wall and the application, a maximum fire resistance of 90 minutes is achieved.
