

Flexible conduit

Reducing sleeve

- 19 mm conduit to 16 mm conduit lead-in.

Article no:	AT1290
EAN:	8712259000909
Amount Packaging	100 st.
Material	Plastic
Halogen free	Yes
Material quality	-
Surface protection	Untreated
Surface polished	No
For tube diameter, large	
For tube diameter, small	
Dispatch	100

Attema has a wide range of flexible conduits for various applications.

Such as ZeroH-flex: halogen-free electroflex, where high(er) demands are made on fire-safe installations. Flame-retardant. KEMA approved according to NEN-EN-IEC 61386-1 and -22.

Electroflex for standard electrical applications.

Attaflex, a halogen-free PE-conduit, resistant to higher temperatures and therefore especially suitable for use in concrete. Mantaflex: conduits suitable as thermal insulation material, for central heating or water pipes for instance. Can also be used as a protective hose for electrical connections of machines. And halogen-free Nylonflex, especially suitable for cables in situations where no toxic and corrosive gases may be released in the event of a fire.
