

## Hybrid FiberManagement Plate

### Distribution closure, housing underground for FMP, IP68

- One universal product for the civil team, independent of the chosen "direct buried" customer connection cable or duct.
- Standard detection coil in the lid (Telecom 101.4 kHz).
- Easy assembly.
- Sand-tight port seals.
- Parts in order of use packed in a sturdy cardboard box.
- Assembly instructions included.
- Dimensions: 90 x 35 x 30 cm (LxWxH), ground cover 30 cm for pipes at a depth of 60 cm.

<b>Article no:</b>	<b>AT29030</b>
EAN:	8712259295503
Amount Packaging	1 st.
Protection rate	IP68

The FiberManagement Plate(FMP) in combination with our Distribution Closure is an underground distributionpoint. This concept has been developed for a maximum of 48 direct buried Fiber to the Home customer cables or duct. The FMP has been designed to separate the civil work and the welding of the fibers. The welding will be done at a later time. With this concept the process of civil work and welding will be optimized. This is due to preassembled parts, the compact size and it is easy to install. This makes the FMP a great fit as an underground distributionpoint. The FMP is also available with a window cut.
