Impact strength	-
Cover model	Loose
Suitable for circuit integrity	Yes
Number of permanent partitions	
Number of plug-in partitions	
With cable fixing clip	No
With protective foil	No
With duct connector	No
Delivery on roll	No
Pre-stamping	No

When installing fiber optic connections in Multi Dwelling Units you must pull several FttH cables upwards from ground level. Attema has developed the MDU Duct Set specifically for this task. From now on you do not need to buy items separate, such as ducts and flexible tubes, anymore. With its FttH MDU 25x40 Duct Set, Attema provides you with the perfect complete solution for installing and transiting of fiber optic cables in Multi Dwelling Units. The set is made up of familiar Attema products. A rectangular duct protects the fiber optic cables and a flex tube ensures a safe and neat transit through the floor levels or wall. Cutting and measuring is no longer needed. All the items in the set are coordinated with each other. This works efficient and shortens the time spent inside the customer premises. The result: a neat distribution board.
