

Street Cabinet + Hybrid FiberManagement Box

Mains distributor (NVt), 96 fibres, HS, 16 outlets, loop

- Street cabinet:
- 60 - 80 µm polyester powder coating.
- Integrated foundation
- Stainless steel
- Universal ½ Euro-cylinder
- Weatherproof mounting panel
- Removable front panel
- Pre-assembled fixing points for ducts and cables.
- FM Box:
- 16 hybrid entry ports Ø5,5 - 10,0 mm.
- Flexibility in the FTTX concept.
- Flexibility in fiber network management.
- Integrated strain relief per cable / duct.
- Easy entry seal for each individual cable or duct.
- Structured management of cables, fibres and welding protectors.
- Suitable for direct buried customer cables and ducts
- Easy to install.
- Save on working time
- IP65 Waterproof
- Impact-resistant
- Window Cut.

Attema's Fiber Management Box (FM Box) with street cabinet is an above-ground distribution point (DP) that has been specially developed for at most 48 buried so-called Fiber-to-the-Home subscriber connection cables or ducts. For the splice mechanic the working method for sorting, splicing and storing the fiberglass cables is the same as for Attema's well-known underground Fiber Management Plate(FMP). Thanks to the pre-assembled parts, the compact format, the supplied suspension bracket and the ease of assembly, the FM-Box is excellent suitable to use in the Attema street. The FM Box with street cabinet is also available with a Window Cut.
