

MDIC FiberManagement Box

Building distributor MDIC Gf-GV,192 fibres, CSP, 48 outlets, IP65

- Suitable for 48 MDIC cables.
- Flexibility in the FTTX concept.
- Flexibility in fiber network management.
- Integrated strain relief per cable / duct.
- Easy entry seal for each individual cable or duct.
- Structured management of cables, fibres and welding protectors.
- Easy to install.
- Save on working time
- IP65 Waterproof
- Impact-resistant

Article no:	AT29366
EAN:	8712259544526
Amount Packaging	1 st.
Protection rate	IP65
Number of Outlets	48

Attema's MDIC Fiber Management Box (FM Box) is an above-ground distribution point (DP) that has been specially developed for at most MDIC subscriber connection cables. This version has been designed for highrise projects that uses MDIC cables as drop cables. For the splice mechanic the working method for sorting, splicing and storing the fiberglass cables is the same as for Attema's well-known underground Fiber Management Plate(FMP). Thanks to the pre-assembled parts, the compact format, the supplied suspension bracket and the ease of assembly, the FM-Box is excellent suitable to use in interior technical rooms. The FM Box is also available with a lock and a Window Cut.
