

Magvast concrete system junction boxes

Magnet MVK40 junction boxes

- High adhesive strength.
- Suitable for MVK40 wall boxes.

Article no:	AT4853
EAN:	8712259280035
Amount Packaging	p.st.
Type of accessory/spare part	-
Accessory	Yes
Spare part	No
Suitable for built-in installation box	Yes
Suitable for central conduit box	No

Attema's Magvast® concrete construction system is used mainly in concrete factories, but also on building sites. Magvast® works with magnets that are clamped into the boxes to prevent concrete water from entering the boxes.

After measuring, the magnets are placed on which the box is then placed. After the formwork is removed, the magnet remains behind on the steel table or formwork, after which it can be removed and reused. Magvast® is then ready for the next cycle. It is a flexible system that does not damage the formwork.

Attema has magnets for various types of boxes in its range. Magnets have a high clamping force (>100 kg).

Suitable for steel formwork.

Attached without drilling, so no damage to the formwork.
